Bye Moon

Original title: Dag maan

Bye Moon is based on Arnold Lobel's Owl at Home and tells about the special friendship between little Anton and the moon. It's about a boy who discovers that the moon follows him everywhere he goes, even though she may be invisible at times... Bye Moon combines poetry, images and contemporary classical music to create an imaginative animation that will touch both children and adults. The film can be performed with live music (violin, hartmann neuron, alesis andromeda and soundscape).
