

# Alice

Original title: Alice

**At least I know who I was when I got up this morning, but I think I must have been changed several times since then,' says a little girl in Lewis Carroll's classic story. In Alice, five women over the age of 40 talk about their journey through Wonderland, the psychiatric hospital where they live and work. They are searching for answers to questions as: 'Who am I?' and 'Where am I going?' How does the confrontation with the others influence their way of perceiving things? Where does reality end and fiction start?**
