

Bardi's Psychostunts

Original title:

Bardi's Psychostunts is a 13-episode TV programme about the Belgian mentalist Jan Bardi, who claims his acts are based on sheer applied psychology. Each episode focuses on one paranormal topic (mass manipulation, teleportation, the Fourth Dimension, astrology, numerology, telekinesis, telepathy etc...) and the whole programme is backed up by amazingly powerful visuals. The first 12 episodes are subdivided into studio and breathtaking stunts on location. The 13th episode is entirely shot in Egypt, where we witness the mystery of the strange powers that emanate from inside the great pyramid of Cheops, a blind drive stunt through hectic down town Caïro, the fascination of the Meidoem desert, etc. This programme is so appealing because it adds that extra and vital element to everyday life : AMAZEMENT - like a long-lost childhood dream. Bardi's Psychostunts are mind-bending acts that will be adored by many both in and outside Europe.
