

# Captured Cities

Original title: Villes Saisies

**Captured Cities is a portrait of two cities, Fez and Casablanca, and of Nadia And Wafae, two women living in those cities. Through their personal stories, two universes unfold that paint a portrait of the way they relate to their city, to public and private space, to the different languages they use, to the body and to modernity. Together, the two stories at the periphery of Europe question the borders and definition of Europe itself.**
