

# Cemetery of State

Original title: Cemetery of State

Chris arrives in an empty city carrying only his guitar case. He walks through the deserted train station towards the locker room where he checks the content of locker number 6. Later on, apparently by accident, he runs into Martin, an old friend from school. Martin introduces him to Anita and Steven who live right across the hall from him. This is the beginning of a whole string of weird incidents and bizarre coincidences that take our four protagonists via a mysterious briefcase full of money and a brutal murder in a downwards spiral of intrigues. It's a story about half truths and too many secrets, about friends and how to double-cross them, about red wine and vacuum cleaners, about your life as a straight line and about the day you have to take the garbage out, but most of all about the sad truth that crime doesn't pay...or does it?
