

Colundi EveryOne

Original title: Colundi EveryOne

Colundi EveryOne is a documentary about the Colundi Sequence, a microtonal scale, consisting of 128 resonant frequencies chosen via experimentation and philosophy, each relating to a specific human bio-resonance, psychology, traditional mysticism or belief, physics, astronomy, maths and chemistry. The Colundi Sequence does you good whether you like it or not. Pulled in by the spiritual other-worldly power this odd musical tuning possesses, filmmakers Juul Verschraegen and Jonathan Cant travel to Cornwall in search of answers and closure. On the way they document their trip and their weird ventures into the world of Colundi.
