

Contemporaries

Original title:

A deconstructive music video for the Finisch lofi/electronica band kiila. Captivating grainy black & white super-8 images of a colorful variety of ordinary people, are edited against the grain on the touching, almost naive music of kiila. A gentle non-video clip statement. Contemporaries is part of the compilation video kiila- heart core video to be released by Fonal records summer 2002.
