

Drifter

Original title: Dwaler

Planet Earth, a timeless future. As a child, Drifter dreamt of becoming an astronaut and now, as an adult, it seems he has made his dream come true. Every day, he shuttles back and forth between earth and space to carry out his daily tasks. One day disaster strikes. Drifter becomes detached from his station and is launched into deep space. Kept alive by a mysterious green liquid, Drifter embarks on an endless drift through the universe. At first, he is petrified. The universe is vast and overwhelming. But gradually, Drifter resigns himself to his fate. Far away from his daily routine, his view of everything, and of himself, changes.
