

Flaxman

Original title: Vlasman

Two elderly brothers, living somewhere between France and Flanders between the 20th and 21st century, are trying to get rich growing flax. Nothing ever seems to change in their pre-war dark and dusty mill. Indifferent to time, they stick strictly to their inexorable routine of working seven days a week. While they try to ignore the changing world around them, their rural village transforms and suburbia closes in on them. Now everything is going to change. The authorities want to shut down the flaxmill. The family is in crisis but there is still hope as the son of the youngest brother wants to continue the business. Will the flaxmen adapt or disappear?

CREDITS
