

Glad That I Came, Not Sorry to Depart

Original title: Glad That I Came, Not Sorry to Depart

Centuries ago, Iranian astrologer and scientist Omar Khayyam wrote 1000 four-line verses. In this eight minute-animated VR experience, artist Azam Masoumzadeh creates a contemporary version of Khayyam's world, inspired by his poems and ancient Iranian miniature art. Khayyam's age-old words are more recognisable than you think and show us a very different world-view of Iran today than that presented by the media. *Glad That I Came, Not Sorry to Depart* is also an AR experience: when you scan the illustrations with the Artivive app, they come to life and music and poetry sing a duet.
