

Globes

Original title: Globes

An essayistic nature documentary mapping out the relationships between honey bees, people and their environment. A bee colony collects stories about the surrounding landscape and plays a mythological role, too. Today, beekeepers from all over America take their bees to California where bees are deployed as seasonal workers to pollinate the crops. In a world in which seasons and regions become interchangeable, *Globes* focuses on the encounters with people who have an intimate bond with bees.

CREDITS

DIRECTOR: Nina de Vroome
PRODUCER: Lotte Van Craeynest
