

GNIA 2007-2010

Original title: GNIA 2007-2010

A 3D-animation... an exploration... a sequence of fragments in which a sculpture is constructed out of nothingness or grows like a plant. The film is full of references and winks directed at our world and the history of art, but is mainly concerned with the interface between sculpture and architecture.

CREDITS

DIRECTOR: Nick Ervinck
