

HOLGUT

Original title: HOLGUT

Siberian villager Roman and city boy Kymm venture into the vast Yakutian wilderness hunting for a rare reindeer, while cloning-scientist Semyon searches an enormous crater for mammoth remains. In the midst of an ongoing mass-extinction, of a Siberian Ivory Rush, and at the dawn of de-extinction, a contemporary myth unfolds. While the three men close in on their goals, both the frozen earth that they walk on and reality itself melts into another state.
