

Hubris

Original title: Hubris

Cyan-A, a mysterious assassin and loyal hand of the Order of Objectivity, is sent on a quest to unravel an event that took place in an unstable Galaxy, far from the reach of the Order's regular armies. On one of the many rocky moons that orbit the twin planet, a world-reforming tower has been hijacked at exactly the same time that a Master of Creation is about to turn the dead moon into a lively little planet. The usual suspects would be the GOC, a group of interstellar hackers. But what about the worshippers who believe that no creature is allowed to reform what they consider to be their God's creation? On her way through the Galaxy, Cyan-A gathers a crew from different backgrounds: Siren, a sinister human of genetic perfection; Ell, a peace-loving young woman and wannabe Master of Creation; and engineer Lex and close combat security guard Ryo. Last but not least, there is Wack, the fixer. On their journey, things become more complex and they begin to suspect that Cyan-A's mission is much darker than she wants them to believe...

CREDITS
