

In The Hands Of Puppets

Original title: In The Hands Of Puppets

At the end of 2018, Sarah and Charles were residents at KAOS, a centre that is connected to the St-Alexius Psychosocial Hospital in Brussels. During their stay, they conducted several interviews with patients and carers in which they addressed the subjects of fiction, reality and personal relationships. Later they interviewed friends and colleagues in their studio and asked similar questions. In this short film, the artists use the online 'chat form' to research subjects like self-analysis, personality and social relations. They explore how we relate to the virtual, share our intimacy with it and how it starts taking control.
