

Inclusive

Original title: Inclusief

"Inclusive education is like teaching children without arms and legs to swim", said a Belgian politician. The general Flemish education system can no longer refuse to accept pupils who have disabilities, handicaps and who require extra care. The M-Decree obliges schools adapt to the needs of children. Everybody has an opinion about it, but the missing voices are those of the children and their parents. Inclusive observes, in beautiful black and white, four children with different special needs going to a normal school. A carefully made, cinematic film that offers an intimate insight into the lives of the four children: Rosie, Sami, Irakli and Nathan.
