

Life To Come

Original title: La vie à venir

Life To Come tells the story of a baby's very premature birth and hospitalisation in a neo-natal unit. Through the newborn's daily life, we discover those who struggle by his side: the parents torn between happiness and concern, and the medical staff who have to deal with crucial ethical choices. Fighting for his life, the premature baby sometimes takes refuge in a mental world created by the memory of his mother's womb. Week after week, the baby gets stronger thanks to the combination of modern-day medicine and the human warmth of those around him. This film portrays the relentless struggle to ensure the baby's survival.
