

Maarten van Severen: Addicted to Every Possibility

Original title: Maarten van Severen: Addicted to Every Possibility

In 2005, famous designer and architect Maarten van Severen dies, leaving an extraordinary collection of furniture and several fascinating architectural projects to his four talented young sons. As we follow the boys' steps towards their promising futures, the tumultuous life of their father is reconstructed. When they are confronted with some of the same challenges as he was, it seems as though history is repeating itself.
