

# Memets

Original title: Memets

Memets chronicles the wacky adventures enjoyed by Adri and her five friends when they discover their world and fulfil their missions. Among them there is an octopus with an elephant's memory; a suicide bomber who doesn't miss a chance to get into trouble; a hairball who is afraid of his own shadow; an inveterate optimist feeling positive in the most negative of situations; a diva who is in love with the optimist; and Dop, who is obsessed and stubborn. They represent six key components of our brain, but will they discover that their world is a child's brain?
