

Mind My Mind

Original title: Mind My Mind

Mind My Mind is a film about how having a brain that is wired differently affects your social life, and particularly your love life. Flirting, sex and romantic relationships are very challenging for people with Asperger's syndrome, as they are associated with thousands of unwritten rules and exceptions. Chris, the main character, deals with his social and emotional limitations together with Hans, a little guy who lives inside Chris's head and who serves as an information processor. In his own unique way, Hans tries to help Chris survive
