

My Transhuman

Original title: My Transhuman

My Transhuman is a fascinating poetic trilogy on the evolution of today's technology, its impact on the human being and our human society. Will men become eternal? The film is divided in eight sections, eight lessons of deep-content interviews, that are intercut with illustrative and relaxing music clips. This film was made because much sooner than we think, today's mankind will simply no longer exist. The makers think it's about time that we start thinking about that.
