Oneiria

Original title: Oneiria

In our high-tech world, technology's unpredictable behaviour is often perceived as negative. But these glitches - 'the ghost in the machine' - can be a starting point to expand the possibilities of image production in the digital age. *Oneiria* uses 'data moshing', a technique in which digital video images are deliberately made unstable, while found footage in different formats (digital HD, VHS, Super 8) is literally used as paint, smearing images to create abstract, dreamlike landscapes.

CREDITS

DIRECTOR: Jeroen Cluckers
PRODUCER: Jeroen Cluckers
WRITER: Jeroen Cluckers
EDITING: Jeroen Cluckers

CREATION DETAILS

TYPE: Film
PRODUCTION SHARE: Majority Flemish Production
YEAR OF PRODUCTION: 2014
