

Online Bodies

Original title: Online Bodies

Online Bodies seeks to explore the manifestation of the body in virtual spaces. The film consists of seven short non-causal parts, each showing a different angle on the online body. The film passes along bodies in transition: a deepfaked porn actor, a 3D model that wishes to be reproduced, a group of genetically modified humans that live inside an alien, four friends discussing cyborg modifications, a body that cannot get up an escalator. Collectively, they highlight the space in between the physical and virtual.
