

# Oops Wrong Planet

Original title: Oops Wrong Planet

**Oops Wrong Planet shows an attractive, rolling landscape from a different planet. An attempt is made to establish contact. Long-distance communication is possible, albeit with some interference on the line. Clear contact appears impossible, though. The static appears like a veil that clouds the picture. The soundtrack of Scanner reinforces the static between distance and vicinity even further. There is the temptation to look behind the picture, so as to bypass the interference and get to a clear picture.**

## CREDITS

**DIRECTOR:** Anouk De Clercq  
**PRODUCER:** Marie Logie  
**WRITER:** Anouk De Clercq  
**PHOTOGRAPHY:** Tom Kluyskens
