

Our Nature – Wild Belgium

Original title: Onze Natuur

The series *Our Nature - Wild Belgium* tells the story of the inhabitants of six Belgian habitats: forests, heathlands, fresh water, open spaces, the coastline and cities. We follow the stories of plants and animals in these environments and discover what they have to do to survive in one of the most densely populated countries of Europe. In the 7th episode, we look at the future and the major challenges facing our wildlife.
