

# Pok

Original title: Pok

A small, nameless vessel is sent to the Earth's ocean by extraterrestrial forces to introduce humans as the dominant species and to seek out a potential partner, human or otherwise. Soon, the vessel finds a fertile barnacle and chooses it as its mate. This cross-breeding results in a rapid evolution of the barnacles, gradually acquiring more and more human traits. A large group of humans emerges, each with a rock for a head, still attached to the barnacle from which they were born. They march as a group toward the shore and kill a small group of ape-like creatures gathered at the water's edge. A new sci-fi hypothesis about the origin of humanity is born.
