

Reverie

Original title: Reverie

As a bird takes us on a fantasy journey through the streets of Paris, we also see things from the perspective of its owner, a young woman. She, in desperate pursuit of her beloved pet, tries to catch up while it flies over the grand boulevards and the Seine. Reverie creates a vision set in an imaginary world that is slightly different from our daily routine and evokes the intense feeling that dreams often give us. To obtain this dreamy, surreal atmosphere, the creators have chosen to work with black-and-white images instead of colour, and to use music and sounds rather than dialogue.
