

Symfollies

Original title: Symfollies

Symfollies is an imaginary created world similar to our world but with its own particularities. The characters in this world are the instruments of a classical orchestra. There is no dialogue between them. To replace the dialogue, all experiences in this world are combined with a piece of classical music. Symfollies came into being, starting from the fact that classical music is appreciated by only a small part of population who are attracted by the auditive rhythm. Later appreciation for classical music is very much influenced by the music heard in childhood. So it is important to confront young children with classical music. Symfollies combines the auditive aspect with the visual aspect in order to offer classical music to all children in an attractive way. Symfollies makes use of the current communication tools (like television) where the focus is not on the classical music itself. It is an indirect way of confronting children with classical music which might awake a positive feeling within them towards classical music. Once a positive feeling has been created, the classical music education can take over and optimally play its role.

CREDITS

PRODUCER: Hilde Mesure

EDITING: Ives Agemans

CREATION DETAILS

TYPE: Series

PRODUCTION SHARE: Majority Flemish Production
BMC Group

GENRE: Animation, Children's

YEAR OF PRODUCTION: 2004
