

The Great Escape

Original title: The Great Escape

From a windowsill, three geraniums gaze out at the banal reality before them, complaining about the dullness of their lives. They're joined by their owner, Patrick, who is just as stuck in his monotonous routine as they are. He's the only person in the room with legs, so he might just be the key to breaking the geraniums out of their motionless prison and helping them escape toward a glorious, free future. When the viewer enters the experience as the third geranium, things finally start to move.
