

# The Last Omelette – The Making Of The Land of the Enlightened

Original title: The Last Omelette - The Making Of The Land of the Enlightened

The story behind the documentary The Land of the Enlightened is as fascinating as the film itself. Shooting over a period of seven years in the chaotic, dangerous and unpredictable war zone of Afghanistan was no easy task. This 'making of' shows that filmmaking is not only a skill but also an art in perseverance and flexibility.
